

PowerLearn™

POWER ALL DAY, ANYWHERE!

Modular classroom desks with integrated plug and learn power

Plug and play simplicity

Integrated power
3A + USB-A + USB-C

Flexible and modular

Safe and rapid setup

SUPPORTING FLEXIBLE LEARNING

The rapid rise in student devices in every area of the curriculum has brought a fresh challenge; the need for all-day power!

The Versa PowerLearn™ desk is the UK's first truly versatile modular classroom desk that connects with plug and play simplicity and ease to neighbouring desks to allow safe, rapid and flexible re-arrangement of a classroom layout by anyone without any specialist equipment or training.

The Versa PowerLearn™ desk has been designed to future-proof learning environments, eliminate dangerous trailing wires and power extensions and keep staff and students engaged and productive. With an integrated power outlet contained within each desk, PowerLearn™ enables everyone to work and study in flexible learning environments.

FUTURE-PROOF LEARNING ENVIRONMENTS

The PowerLearn™ desk can be used in all educational settings, for students of all ages, including Schools, Colleges, Academies, Universities and Further Education sites.

ICT Suites | All Classrooms | Libraries | Breakout Areas | Learning Zones

The PowerLearn™ desk can also be used in commercial offices, training centres, conference venues and work spaces of all types.

FEATURES	ADVANTAGES	BENEFITS
PLUG AND PLAY	Easy to use. Anyone can adjust it and plug it together without the need for tools.	Doesn't require your IT team or electricians to reconfigure cables. No expense associated with classroom reconfiguration.
FLEXIBLE	Allows more flexible learning.	Gives the teacher scope to reconfigure a classroom whenever they want to, without having to worry about wiring, cabling and insufficient power supplies.
MODULAR	One power source will run six desks.	Power all day, anywhere. No flat devices = no missed learning opportunities.
RAPID SETUP	To suit different teaching styles or lesson plans.	Teachers can be more creative with their classroom space allowing for collaboration, group work, debating and conference layouts.
SAFE	Desks are locked together. RCD protection device. Desk comes with a resettable thermal fuse.	This prevents them from being dragged apart and moved out of alignment. The RCD device gives complete protection for the students. If the module is overloaded, the fuse safely disconnects the power and is easily reset by the teacher or student once the power load is removed.

SPECIFICATION

The Versa PowerLearn™ desk is supplied pre-wired for IT power provision using an integrated wiring loom comprising a robust power module (3A, 230/240VAC and USB-A and USB-C charging ports). A flexible lead and a corresponding connector allows power to be transferred to adjoining desks.

Specialist desk connectors ensure safe 'locking' together to prevent cable damage and an integrated cable tray allows the excess cable to be stored away from the student's reach.

The Power Kit pack allows the Versa PowerLearn™ desk to be connected to a nearby wall or floor socket through an RCD protected plug and cable ramp for safety. Height-adjustable feet enable the desks to be levelled on uneven floors.

SIZE

600 x 600 x 760mm
